

Site Environmental Policy

Cooper Specialist Groundworks Limited acknowledges the impact its activities within the civil engineering and construction industry have on the environment and accepts its responsibilities and obligations to contribute to the resolution of global and local environmental issues. Cooper Specialist Groundworks Ltd aims to reduce its environmental impacts by making a commitment to the principles of sustainable development and promotion of environmental good practice.

Cooper Specialist Groundworks Environmental Policy will ensure compliance with environmental legislation and the prevention of pollution through appropriate risk control consistent whilst maintaining an exceptional service to its customers.

We are committed to the following principles:

- Work closely with clients to identify key environmental issues and seek innovative solutions and appropriate alternatives.
- Continually monitor and implement new best practice principles.
- Ensure all employees have an understanding and are trained in their responsibilities in relation to the environmental policy and management system

Environmental Impact – Considerations for Site Specific Assessments

- **Removal of waste** – Recycle where possible, all waste to be removed in accordance with the waste transfer hierarchy.
- **Deliveries/Collections** – Materials to be on site using the least amount of deliveries and/or collections as is practical.
- **Refuelling** – All fuels to be stored in appropriate bunded containers and refuelling to take place in designated areas on drip trays.
- **Access/egress of workforce/subcontractors** – workforce to mobilise to site in the least number of vehicles as possible.
- **Depletion of resources** – All materials to be accurately estimated and stored as per guidelines to prevent waste.

We aim to make continuous improvements as our organisation develops and, in order to achieve this, this Policy will be reviewed on a regular basis.
