CSG
Cooper Specialist Groundworks

Who are Cooper Specialist Groundworks?

We are a leading Civil Engineering and Groundworks specialist and work across Industrial, Commercial and Housing sectors. CSG Ltd was founded and incorporated in the heart of the Midlands in 2016 by Andrew Cooper.

We are passionate about and committed to providing cost-effective solutions, without having to compromise on quality.

Our Skills

Each project we undertake is led by a site management team with extensive knowledge, who focus on ensuring health and safety standards are consistently met and the client is provided with cost-effective solutions at all times without having to compromise on quality or the desired end result.

Within our teams are highly-trained groundworkers who are vetted and handpicked based on their skills and knowledge within the civil engineering industry.

We own and invest in our plant and machinery and have a strong supply chain which enables us to work effectively nationally.

Our Clients

Our clients are at the heart of our company, which is evident in every project we tender for, are awarded and complete.

Throughout the duration of the projects we work closely with our clients to ensure they are always up to date with our progress, any value engineering opportunities and most importantly are happy with the work / service received.

The team at CSG Ltd always work professionally, are approachable and work hard to build lasting working relationships with our clients.

Foundation / Block & Beam

We complete all cast in-situ concrete projects, with specialist crews covering formwork/falsework, steel fixing and custom fabrication and finishing crews. We have large accounts with the nations leading ready-mix concrete suppliers due to the volume of concrete we use each month, allowing us to provide fast, cost-effective solutions.

Drainage

As well as the laying of conventional drains and sewers, we are also highly capable of working to SUDS specifications, including large permeable paving applications, orifice/hydrobrake chambers, and large attenuation fields.

Housing Projects

Roads / Driveways

With our team being highly experienced in Paving and Asphalt, this has become a large aspect for many projects. We design and install access roads to new housing developments and create large scale driveways.

Housing Projects

Recent Housing Projects

With many housing projects completed across the UK since we began in 2016, we are committed to providing high quality, cost-effective solutions. Read about our latest projects here.

Location: UK Wide

We have engaged with CSG on more than one project to deliver a range of mid to large build schemes. The CSG team were fantastic from first quotation to finish. Their wealth of knowledge is apparent as we were given great advice about the technical aspects of their work - this filled us with confidence that CSG were the right team for the job.

Very friendly, honest, fair, professional and exceptional quality work. I would definitely recommend them and will have no hesitation in using CSG for future projects.

UK Housebuilder

Environment & Sustainability

Cooper Specialist Groundworks Environmental Policy will ensure compliance with environmental legislation and the prevention of pollution through appropriate risk control consistent whilst maintaining an exceptional service to its customers.

We are committed to the following principles:

- Work closely with clients to identify key environmental issues and seek innovative solutions and appropriate alternatives.
- Continually monitor and implement new best practice principles.
- Ensure all employees have an understanding and are trained in their responsibilities in relation to the environmental policy and management system.

Environmental Impact – Considerations for Site Specific Assessments

- **Removal of waste** – Recycle where possible, all waste to be removed in accordance with the waste transfer hierarchy.
- **Deliveries/Collections** – Materials to be on site using the least amount of deliveries and/or collections as is practical.
- **Refuelling** – All fuels to be stored in appropriate bunded containers and refuelling to take place in designated areas on drip trays.
- **Access/egress of workforce/subcontractors** – workforce to mobilise to site in the least number of vehicles as possible.
- **Depletion of resources** – All materials to be accurately estimated and stored as per guidelines to prevent waste.

We aim to make continuous improvements as our organisation develops and, in order to achieve this, this Policy will be reviewed on a regular basis.
