

CASE STUDY: Cannock Industrial Estate

Location: Cannock Industrial Estate
Project: Resurface Industrial Estate roads for multiple clients

Our Work: Works included erection of traffic management, extensive verge clearance through reduced dig, road planing and removal of waste, resurfacing with binder and surface course, reinstating linemarkling. Improve the condition of roads for their heavy HGV traffic flow. Project completed within 36 hour timeframe with the road returned to service

Recent Successful Projects

CSG have successfully completed many projects across the UK in housing, infrastructure, commercial and industrial.

Since we began in 2016, we have been committed to providing high quality, cost-effective solutions. Read about our latest project.
