CSG
Cooper Specialist Groundworks

Who are Cooper Specialist Groundworks?

We are a leading Civil Engineering and Groundworks specialist and work across Industrial, Commercial and Housing sectors. CSG Ltd was founded and incorporated in the heart of the Midlands in 2016 by Andrew Cooper.

We are passionate about and committed to providing cost-effective solutions, without having to compromise on quality.

Our Skills

Each project we undertake is led by a site management team with extensive knowledge, who focus on ensuring health and safety standards are consistently met and the client is provided with cost-effective solutions at all times without having to compromise on quality or the desired end result.

Within our teams are highly-trained groundworkers who are vetted and handpicked based on their skills and knowledge within the civil engineering industry.

We own and invest in our plant and machinery and have a strong supply chain which enables us to work effectively nationally.

Our Clients

Our clients are at the heart of our company, which is evident in every project we tender for, are awarded and complete.

Throughout the duration of the projects we work closely with our clients to ensure they are always up to date with our progress, any value engineering opportunities and most importantly are happy with the work / service received.

The team at CSG Ltd always work professionally, are approachable and work hard to build lasting working relationships with our clients.

Providing solutions for schools, office buildings, hotels, car forecourts.

Drainage

Solutions for redesigning car showroom forecourts that experience flooding, poor design and re-surfacing requirements.

Re-tarmacing

We complete all cast in-situ concrete projects, with specialist crews covering formwork/falsework, steel fixing and custom fabrication and finishing crews. We have large accounts with the nations leading ready-mix concrete suppliers due to the volume of concrete we use each month, allowing us to provide fast, cost-effective solutions.

Re-Surfacing

We carry out resurfacing works on working industrial sites and distribution centres so we understand the extreme importance of ensuring any disturbance to day to day running is kept to a minimum.

Following this process our team will provide guidance and support to help you understand what can be achieved within the constraints of a busy site as well as discussing budget and time frames. Trust us to offer expert and transparent advice that will help you to make an informed decision.

Line Marking

Line marking isn't just about marking out new lines either. We could be refreshing existing lines or removing and totally re-configuring an outside space, we can offer you bespoke drawings to help bring your ideas to paper and show you the best outcomes.

We use specialist equipment and materials such as thermoplastic, sprays to carry out our car park and commercial line marking services. Whatever the surface and requirements we can deliver.

Recent Commercial Projects

With many commercial projects completed across the UK for schools, office buildings, hotels, car forecourts, since we began in 2016, we are committed to providing high quality, cost-effective solutions. Read about our latest projects here.

Resurface Pedestrian Access

I cannot recommend the services of Cooper Groundwork Specialists enough. The professionalism and discretion of the work and courtesy towards neighbouring businesses and surrounding works was impeccable.

Car Dealership - Drainage and Resurfacing Works

The most efficient team I've dealt with this time and last. Carried out the work with a minimum of disruption to us in a very timely manner and left the site as good as when they arrived but hopefully without the "lakes".

If the last job is anything to go by it should all work as the last job seems to have been 100% successful.

Concrete Bases

We have had CSG Ltd lay a number of concrete bases on our commercial site in preparation for new units to be installed.

They were very professional and ensured the project stuck to the tight timescales that we had to give them.

Thank you for all your hard work

Environment & Sustainability

Cooper Specialist Groundworks Environmental Policy will ensure compliance with environmental legislation and the prevention of pollution through appropriate risk control consistent whilst maintaining an exceptional service to its customers.

We are committed to the following principles:

- Work closely with clients to identify key environmental issues and seek innovative solutions and appropriate alternatives.
- Continually monitor and implement new best practice principles.
- Ensure all employees have an understanding and are trained in their responsibilities in relation to the environmental policy and management system.

Environmental Impact – Considerations for Site Specific Assessments

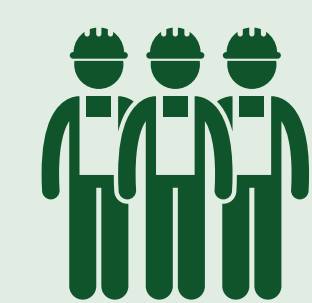

Removal of waste – Recycle where possible, all waste to be removed in accordance with the waste transfer hierarchy.

Deliveries/Collections – Materials to be on site using the least amount of deliveries and/or collections as is practical.

Refuelling – All fuels to be stored in appropriate bunded containers and refuelling to take place in designated areas on drip trays.

Access/egress of workforce/subcontractors – workforce to mobilise to site in the least number of vehicles as possible.

Depletion of resources – All materials to be accurately estimated and stored as per guidelines to prevent waste.

We aim to make continuous improvements as our organisation develops and, in order to achieve this, this Policy will be reviewed on a regular basis.
