

CASE STUDY: Collins Aerospace, Marston Green

Location: Marston Green
Project: Car park extension and additional office building construction

Our Work: Installation of new permeable open grade granite sub base to meet SUDs and local authority requirements.

This also included orifice and hydrobrake chambers.
New kerbing, asphalt and permeable block paving surfaces. Lamp posts and lighting as per lighting plan. CCTV poles and cameras. Connection of all services. Installation of 142 concrete foundations for new 'Lucas' modular office building.

This project was completed within the timescales agreed at the pre-start meeting. CSG provided the connection of all services, liaison for lifting operations and finishing around new building. Large reinforced vertical cantilever retaining wall to east side of site. Remediation and removal of 6500 tonnes of contaminated ground.
