## Recent Case Studies

## Who are Cooper Specialist Groundworks?

We are a leading Civil Engineering and Groundworks specialist and work across Industrial, Commercial and Housing sectors. CSG Ltd was founded and incorporated in the heart of the Midlands in 2016 by Andrew Cooper.

We are passionate about and committed to providing cost-effective solutions, without having to compromise on quality.

## Our Skills

Each project we undertake is led by a site management team with extensive knowledge, who focus on ensuring health and safety standards are consistently met and the client is provided with cost-effective solutions at all times without having to compromise on quality or the desired end result.

Within our teams are highly-trained groundworkers who are vetted and handpicked based on their skills and knowledge within the civil engineering industry.

We own and invest in our plant and machinery and have a strong supply chain which enables us to work effectively nationally.

## Our Clients

Our clients are at the heart of our company, which is evident in every project we tender for, are awarded and complete.

Throughout the duration of the projects we work closely with our clients to ensure they are always up to date with our progress, any value engineering opportunities and most importantly are happy with the work / service received.

The team at CSG Ltd always work professionally, are approachable and work hard to build lasting working relationships with our clients.

## End-to-End Project Management

We work with multiple councils to undertake drainage connections for housing projects. We deal with the end-to-end project from obtaining the section 50, road closure, traffic management plan with the council down to liaising with the council representatives onsite to get the work approved and reinstatement work. Works are carried out in the roads / public footpaths.

We have a close working relationship with local traffic management companies so are able to put together suitable plans to be submitted to the council and who work with us throughout the duration of the project to ensure road and pedestrian safety is maintained. All of our teams have their up to date streetworks tickets to ensure we remain compliant.
